Career Objective

BTech ECE final-year student with strong interest in full-stack development and problem-solving. Passionate in learning and developing multiple web projects. Actively preparing DSA and seeking a software development role to apply and expand my technical skills.

Education

Techno International New Town, B.Tech in Electronics & Communication Engineering 2022 – 2026
• CGPA: 7.61

Nava Nalanda High School, 12th- Science 2019 – 2020
• Percentage: 90

Nava Nalanda High School, 10th 2017 – 2018
• Percentage: 88.43

Projects

Smart Parking System

- **Tech:** HTML, CSS, Java Script, Python
- Designed an IoT-based Smart Parking System integrating ESP32, IR sensors, servo motors, and Firebase to automate slot booking and real-time data management.
- Implemented QR code-based access to securely open/close the gate, ensuring entry is granted only for valid bookings, with automatic removal of car data upon exit.
- Developed a real-time fee calculator with time tracking and penalty logic, enabling accurate billing and enforcing time-based slot discipline.
- Ensured efficient time management through features like preferred slot selection, stack-based assignment, and live dashboard updates for admin monitoring.

Skills

Languages: C++ (Data Structures and Algorithms), HTML, CSS, JavaScript

Frameworks: React, Node.js, Express

Database: Firebase, MongoDB

Tools: Git, GitHub, VS Code
